

Process and Knowledge Management

Problem

The development of a product from lab scale to full production can be fraught with delays, struggle with standardization of workflows, specifications, and product definition, and face commercial and business challenges in collaboration between research, engineering, finance, and manufacturing teams.

Solution

A digitized technology transfer will reduce production costs, prevent loss of product due to quality, and avoid regulatory fines and penalties, while increasing sales and creating a competitive advantage.

noesis

A proven process management solutions partner, providing data insights and connectivity across any level of an organization to maximize business decision making.
